

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Currently, Indiana's Telephone Privacy law has greatly improved my time at home. When I get home, I now only have maybe 2 "telemarketing" call a week. Prior to the implementation of the law, I was receiving almost 20 calls a week from telemarketers. At least now, I am able to receive calls from my family and friends and not have my answering machine filled by telemarketing automated messages. I think it VERY important that the FCC not undermine the laws passed by individual states. Thank you.
